**SUMMARY OF INTERVIEW IN ACCORDANCE WITH
37 CFR 1.133(b)**

Sir:

In accordance with 37 CFR 1.133(b) applicant submits the remarks below summarizing the telephonic interview with the Examiner conducted on December 1, 2003.

REMARKS

1. Exhibits shown: None.

2. Claims discussed: 1

3. Prior art discussed: Pat. No. US 6,342,826 (Quinn)

4. Proposed amendments discussed: None

5. General thrust of principal arguments presented: The Quinn reference failed to show a short circuit of the battery electrodes, the switch element was not shown short circuiting the battery electrodes, the Examiner inappropriately modified embodiments with connections of other embodiments to arrive at an anticipation rejection, and that connection of a switch element as a sensor to a logic control circuit which controls a charger does not teach the switch element forming a short circuit across the battery electrodes.

6. Other pertinent matters discussed:

7. General results or outcome of interview: No agreement was reached.

Respectfully submitted,
